

1-10V LED Dimmer Switch with IR Remote

- Supply Voltage: AC90-240V 50/60Hz
- Output: 1 Channel
- Circuit Design with Security Isolated for protect load safety
- Max Load Power: 800W
- Max Current: 10A
- Dimming Range: 1-10V
- Control Mode: Manually & IR Remote
- Remote Distance: 10M
- Compatible with over 90% of LED Drivers based on standard 1-10V Dimming

Our 1-10V LED Dimmer Switch for LED Lighting has a grey scale level 255. An added consequence is that you can schedule a shut down 1-4 hours. This feature is very easy to use by using the Remote Control brightness hot key and fixed grey output functions. Our 1-10V Dimmer Switch is operated by turning the knob on the switch clockwise to increase the brightness. Turning the knob counter clockwise will decrease brightness.
